---

Focused and creative **iOS developer**, passionate about creating apps using **Swift**. Caring for users and the big picture, not just the code. I love creating awesome iPhone & iPad Apps that really makes a difference. Happy to participate in your existing or potential mobile app. Open to explore middle-level iOS roles.

## SKILLS & TOOLS

- 
- |               |                           |                      |                              |
|---------------|---------------------------|----------------------|------------------------------|
| - Swift       | - MVP, MVVM               | - Restful APIs, JSON | - Core Data, Realm, Firebase |
| - Git, GitHub | - SwiftUI, UIKit, SnapKit | - Codable, Alamofire | - Google Maps, MapKit        |
| - OOP, POP    | - Storyboard, Xib         | - GCD                | - Core Location              |

## EXPERIENCE

### iOS Developer @ Natife

Dec 2021 – Present

Contributed on every level of app development. Worked in an environment of experienced iOS developers to create the cleanest possible code.

- Drafted 5+ commercial app
- Supported application using Objective-C language and Reactive Extensions standard
- Took the main role in legacy code refactoring to enhance code architecture
- Closely collaborated inside the team of 20 developers, reviewed code, influenced technical decisions

### Freelance Developer @ CFOOD

June 2021 – Dec

Core developer on a team, responsible for the stable operation of all development processes.

- Took the main role in planning and estimating costs for creating MVP iOS application
- Worked closely with UI/UX designers to produce a pixel-perfect design
- Responsible for the integration of the 1C and IIKO CRM systems
- Supervised the creation of the online store

## EDUCATION

---

SwiftUI Masterclass 2022, [iOS 15 App Development](#)

iOS & Swift, App Developer, [The Complete Development Bootcamp](#)

Multithreading, GCD, Operation, [Advanced Swift Multithreading Course](#)

## PROJECTS

### Shupperz

Shupperz is a social networking platform that enables shoppers to shop for international brands on local sites and apps. Implemented real-time chats, added the ability to place and pay for an order, also added the ability to track the package on Google and on Apple maps.

### Imaginarium

A game in which you need to explain, draw, complete tasks. A mobile version of the popular board game Alias, but with additional tasks and features.
